Mr. Baoquoc N. To
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Statement of the Substance of the Interview

Dear Mr. To,

This "Statement of the Substance of the Interview" is to response to your "Interview Summary" mailed to me on May 13, 2010. You mailed me the "Office Communication" on April 15, 2010. We had a telephone interview on April 23, 2010, and I called you and exchanged emails with you on May 12 & 14, 2010. I followed your instructions as to cancel claims 1 & 3 and to rewrite claims 2 and 4-7. Attached are the clean and amended versions of my amended claims on which both of us have agreed. I require your office to allow my claims as soon as possible.

I sent my "Reply to 'Office Communication' and Request to Allow Claims 1-7" to your office on April 27, 2010. I insist that claim 1 & 7 are patentable under 35 U.S.C. § 101 and cannot be rejected under U.S.C. § 103(a). Claims 1-7 should be all allowed. I believe that the Claims 1-7 structure and dependence relationship are the best to show the value of this invention. Attached are the clean and amended versions of claims 1-7.

I mailed the "Request for Reopen Prosecution before Examiner on the Decision of the Board of Patent Appeals and Interferences" under 37 CFR § 41.77(b)(1) to your

office on February 7, 2010 and on September 27, 2009, which state enough factual merits and legal bases to oppose the Board's decision to sustain your rejection of Claims 1 & 3.

My patent application is very significant in both technology and economy fields. It has taken ten years now since I filed my application in your office on October 2, 2000, which has wasted half of my productive years in my life and caused great pain to my spirit, to my career and my personal life. I have been taking the public aid for six years now. Further more, we have suffered great economic crises and the US has lost 8.4 million private jobs since I started my appeal to the Board. I request your office to allow my patent application as soon as possible. Once my patent is approved, I will find the venture capital funds to implement it as commercial software products, which will play a very significant role to make progress for our "Hi-Tech" industry and to prosper our economy.

Sincerely,

A handwritten signature in cursive script that reads "George G. Yang". The signature is written in black ink and is positioned above the printed name.

George Guang Yang, Ph.D.

Independent Inventor/Appellant
